

ENVIRONMENTAL INTERVENTION FOR ASTHMA & COPD

TRUE Asthma Trigger Removal!

Federal Funding Available in ALL 50 States for Assistive Technology

Real Time IAQ Verification

THE AERIFY PROTOCOL

The AERIFY PROTOCOL offers a New and Highly Effective Treatment Change Idea. Pathogen and Allergen-Free Air in the home environment will better protect patients with chronic respiratory conditions, such as Asthma and COPD while offering patients with compromised immune systems enhanced protection from dangerous airborne exposures.

The AERIFY PROTOCOL offers Medical Grade Assistive Devices that provide Environmental Intervention and Asthma Trigger Management by removing greater than 99.99% of all Indoor Particulates .01 microns or larger from the Asthma patient's bedroom environment.

The AERIFY PROTOCOL includes 24/7 Indoor Air Quality monitoring of the Asthma patient's bedroom environment and can make adjustments to improve the number of Air Changes Per Hour to remove Allergen and Pathogen triggers from the Asthmatic's home bedroom environment.

PURE AIR FOR ALL

- Removes Greater than 99.99% of all airborne pathogens and allergens, including Covid variants
- Improved Symptom Scores
- Improved Quality of Life Scores
- Reduced Medication Requirements
- Improves Patient Outcome Potential
- Increased Physician Management Capability
- Reduced Environmental Disorder & Improved Patient Engagement

The AERIFY PROTOCOL captures emissions from Mite, Dog, Cat, Pest, and Other Household Allergens, significantly reducing Medication Requirements for patients with HDM-Induced Asthma.

The AERIFY PROTOCOL, by providing continuous Environmental Intervention AND 24/7 monitoring, provides Asthma patients with quantifiable Indoor Air Quality improvement, thus giving the physician a better understanding of how to diagnose, treat, and provide the best medical outcome possible.
